Spring Boot

This certificate was issued by INCAPP after completing 4months training in **Spring, Hibernate, Microservices** Technology successfully

Web Designing

This certification was issued by INCAPP after completing 3months training in **HTML, CSS, JS, Bootstrap** Technology successfully.

Projects

NoteMaker | *JAVA, JPA, MySQL* | **View on GitHub**

- I developed and tested APIs for the NoteMaker project using Spring Boot, JPA, and Gradle, while managing the database with SQL Workbench.
- I implemented security features with Spring Security to protect data in NoteMaker and completed the project by handling all database operations with JPA.

Portfolio Website | *HTML, CSS, JavaScript, JQuery, AOS, GSAP* | **View on GitHub**

- I created an interactive portfolio website that showcases my projects and skills, using a mix of web development technologies to ensure a smooth user experience
- I designed the entire site to be fully responsive from scratch, using custom CSS and media queries to make sure it looks great on all devices.
- To make the site more visually appealing, I added engaging animations with GSAP and AOS, which really enhance the navigation and overall feel for visitors.

Weather App | *React JS, Material UI* | **View on GitHub**

- I developed a weather application that fetches real-time data using **React** and the Open Weather **API**, providing users with current weather information for any location.
- I integrated **asynchronous API calls** to ensure smooth data fetching and display of weather details, enhancing user interaction and experience.
- Integrated **Material UI** for responsive design and seamless user experience.
